You could ask your recruiter to review your form (there are very cool and could help you a lot since they have a bigger experience).Do a search on the potential team.Before the interviews, try to find smart question that you are going to ask for the potential host (do a search on the team to find nice and deep questions to impress your host). Prepare well your resume.You are very likely not going to get algorithm/data structure questions like in the first round. It's going to be just some friendly chat if you are lucky. If your potential team is working on something like machine learning, expect that they are going to ask you questions about machine learning, courses related to machine learning you have and relevant experience (projects, internship). Of course you have to study that before the interview. Take as long time as you need if you feel rusty. It takes some time to get ready for the host matching (it's less than the technical interview) but it's worth it of course. Just register on the admission portal and during registration you will get an option for the entrance based course. Just register there. There is no separate form for DU CIC. Filling forms is a relative thing.Starts from someone else filling Birth Certificate and goes on till someone else fills Death Certificate.Student as an individual starts filling forms from Class 10, then class 12, then depending on the stream. College application form or competitive exam forms and then college application forms.Most "Students" stop here.However, few of us make the mistake of doing Masters. Which again follows the same pattern. College admission forms or competitive exams form followed by college application forms.However, I have finished my education life (hopefully) 5 years back, but I still fill forms. Visa application forms, to investment forms, to project status forms and what not.Forms are basically Data collected in a particular format, that will help in faster processing of application. Or in some cases to meet the regulatory requirements.
